In addition to the TMT product, mgm provides the following test management–related services:

Test Center / Testing-as-a-Service:

Our eQA team (extended QA) is a highly skilled and dedicated team that conducts user acceptance tests on behalf of the client. The team ensures client-centric, independent, and cost-effective software development oversight, delivering comprehensive reports to facilitate swift release decisions.

QA Expert Support:

mgm has a team of hundreds of experienced QA professionals. We offer professional guidance and support to our clients during the set-up of new test teams.

Predefined Test Case Catalogs:

The use of pre-existing structures can lead to extensive test coverage and time savings in many test scenarios. mgm provides predefined test case catalogs, which can be imported into your TMT environment. These include test case catalogs that are tailored for e-commerce projects, accessibility, and web security. Additional customization options are available.

Technical Consulting:

In the realm of software testing, the operational setup, maintenance, and deployment are crucial. Leveraging our extensive experience from numerous software projects, mgm has developed best practises to optimize the efficiency, reliability, and security of QA operating environments. We offer these insights to our customers through consulting services.
